🗣 Languages Known: English, Malayalam, Hindi

Skills

- Technical Skills
  - Proficient in Python and C programming
  - Basic knowledge of Java
  - Understanding of Operating Systems and DBMS
  - Familiar with AI tools
  - ERP system customization using ERPNext and Frappe and basic understanding of backend development using FastAPI
  - Database understanding with MongoDB, MySQL, and MariaDB
- Tools & Platforms
  - Visual Studio Code
  - Postman
  - Canva

Education

Final-year B.Tech Computer Science Engineering student at Muthoot Institute of Technology and Science

OCT 2022 - PRESENT

Student with a solid foundation in Python and C, developed through coursework and hands-on projects. Recently completed an internship involving ERPNext, Frappe, and MariaDB, where I gained practical exposure to backend ERP development. Additionally, familiarized with the basics of FastAPI and the MERN stack through certified add-on courses conducted at college. Eager to grow in full-stack and backend development roles while continuously expanding my technical skill set.

Higher secondary education

2018 - 2020

Pookoya thangal memorial higher secondary school, Vellila

Secondary education

2012-2018

Silvermount International school, Perinthalmanna

Primary education

Modern Indian school, Dibba,Al-Fujalrah

Projects

Fynapse – Personal Finance Insights Engine

Built an AI-powered system to analyze bank transactions and provide personalized financial insights using LLMs, LangChain, LlamaIndex, FAISS, and RAG. Achieved 90%+ automated expense categorization and 15–25% spending optimization. Developed scalable backend APIs with FastAPI and an interactive dashboard using Streamlit to deliver real-time budgeting and optimization suggestions.

Hayat – Healthcare Appointment System

ERPNext, Frappe, Python, MariaDB

Developed **Hayat**, an end-to-end healthcare management system on ERPNext and Frappe. Implemented multi-level approval workflows for patient and doctor onboarding, dynamic appointment scheduling with specialization filters, automated pharmacy notifications for prescriptions, and custom print formats for insurance claim breakdowns. Improved operational efficiency and digital record-keeping for clinical workflows.

Library Management System (Frappe/ERPNext)

Designed and implemented a custom Library Management System using the Frappe framework. Built Doctypes such as *Library Member* and *Library Membership* with validation logic, custom scripts, and workflow rules to manage member enrollments and prevent duplicate active memberships. Integrated form-level checks, database queries, and submission controls for robust functionality.

Rental Management System

Contributed as a Python intern to a rental management system built with ERPNext/Frappe and React. Assisted with minor backend tasks such as email verification generating bills, reports etc. On the frontend, helped implement small UI features like item sorting, cart handling, and discount input fields. Gained hands-on experience by completing assigned tasks under guidance as part of a larger development team.

Veriwrite

A Handwritten and Text Plagiarism Detection Tool

Mini project developed during 3rd year. Veriwrite is a software tool designed to detect plagiarism in both handwritten and typed text documents. It integrates with classroom platforms to improve learning efficiency by ensuring originality. The system enhances detection accuracy by combining OCR techniques with plagiarism-checking algorithms,

Soft Skills

- Effective communication
- Teamwork and collaboration
- Time management
- Emotional intelligence
- Problem-solving and critical thinking
- Adaptability and quick learning

Library Management System

A Web-Based Library Access and Inventory System

Developed a web application that enables users and library staff to interact with and manage book inventory efficiently. The system allows students to search, reserve, and issue books, while administrators can track book availability, overdue items, and maintain records. The project aimed to simplify library workflows and improve user experience for both staff and students.

Certificate Generator

Automated Certificate Creation Tool

Designed and built a certificate generation system that accepts template files and user data, and automatically produces customized certificates. This tool helps organizations streamline the process of certificate creation for events, training, or competitions, ensuring consistency and saving manual effort. Outputs can be exported in printable formats like PDF.

Internship Experience

Python Intern
at **Faircode** (Kochi, Kerala 682020
May 2024 – June 2024
Technologies: Python, ERPNext, Frappe, MariaDB

- Contributed to the development and customization of ERP modules using ERPNext and Frappe framework
- Wrote backend logic in Python to support automated workflows and form validations
- Worked with MariaDB to structure databases, perform queries, and manage data
- Gained experience in real-time issue resolution, server scripting, and ERP process automation

Certifications

- **Add-on Certification: Generative AI & Web Development** – *2025*
  Completed a certified college workshop covering modern web development tools and the fundamentals of generative AI models and use cases.
- **Python Development Internship – ERPNext & Frappe** – *May–June 2025*
  Completed an academic internship focused on backend development using Python, ERPNext, and MariaDB. Worked on real-world ERP module customizations and server scripting.
- **NPTEL Online Certification – Google Cloud Computing Foundation** – *2024*
  Completed foundational coursework in cloud infrastructure and services offered by Google Cloud Platform.
- **Linguaskill English Proficiency Certification (B2 Level)** – *2024*
  Achieved B2 level English proficiency via Cambridge Assessment English's Linguaskill test.
- **MERN Stack Certification**
  Completed an introductory MERN stack certification program held at college, covering MongoDB, Express, React, and Node basics.
- ***ICEFOSS 24 Cyber Defence Bootcamp – FISAT***
  Participated in a bootcamp on cyber defense, ethical hacking principles, and threat detection techniques.
- **Generative AI Certification**
  Gained basic understanding of prompt engineering and generative AI applications through an online workshop.
- **Tinker-Her Hackathon Participation Certificate** – *2024*
  Participated in Kerala's largest women-only hackathon, focused on building inclusive tech solutions.
